Full-Stack Developer | React / Next.js | React Native

Open to Full-Time & Remote Roles

PROFILE

Full-stack developer specialized in React, Next.js, and React Native, focused on shipping reliable products end-to-end — from interface to API to deployment. Built **ScanHadir**, a QR-based digital attendance system with real-time tracking and location verification. Experienced mentoring junior developers and collaborating with cross-functional, English-speaking teams; open to full-time or remote roles in Singapore and beyond.

TECHNICAL SKILLS

Frontend & Mobile	React, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS
Backend & Data	Node.js, NestJS, MongoDB, Supabase, API Integration
Tools & Practices	Git, CI/CD, SEO

FEATURED PROJECT

ScanHadir

Digital Attendance & Workforce Verification System

- Designed and built a full-stack attendance platform with QR-code check-in, replacing manual logging and closing common loopholes like buddy-punching.
- Implemented real-time attendance tracking with GPS-based location verification, ensuring every check-in is accurate, timestamped, and tamper-resistant.
- Built an admin dashboard for live monitoring and reporting, giving administrators instant visibility into attendance across users and locations.
- Applied a security-first workflow throughout — from QR validation to session handling — to protect data integrity and prevent spoofing.

Stack: React/Next.js • Node.js/NestJS • MongoDB/Supabase • TypeScript

EXPERIENCE

Full-Stack Developer — Full Code Studios — Jul 2024 – Apr 2026

- Built and shipped full-stack web applications using React/Next.js and Node.js/NestJS, owning features from concept through production deployment.
- Integrated internal and third-party APIs to power core product functionality, improving reliability of data flow across services.
- Set up CI/CD pipelines to automate testing and deployment, reducing release friction and manual errors.

Front-End Developer — Cloud Gakkai — Sep 2023 – Jan 2024

- Developed responsive, accessible interfaces with React and Tailwind CSS, improving usability and consistency across devices.
- Applied SEO best practices to client-facing pages, improving organic visibility and page performance.
- Partnered with backend engineers on API integration, ensuring smooth data exchange and consistent UI state management.

Mentor — UnboxLabs — Sep 2023 – Mar 2024

- Mentored junior developers in React, JavaScript, and full-stack fundamentals, accelerating onboarding and technical growth.
- Reviewed code and coached best practices, improving code quality and consistency across mentee projects; recognized with a certificate of appreciation for contributions to technical training.
